REVOLVE

Healthy soils & healthy water for a healthy future

Thursday, 25 April 2024

18.30 – 20.30

The Nest City Lab, Barcelona

REGISTRATION

Did you know soils house over 25% of the world's biodiversity? Healthy soils and secure water sources are paramount in our pursuit of climate resilience. They are vital for crop nourishment, water purification, and carbon storage. Yet, it's alarming that 60% of soil in the EU is classified as degraded. Join us for a solutions-driven panel discussion on soil health and water sustainability!

The latest issue of REVOLVE Magazine – Issue 51 focuses on soil health and nature preservation from technology to community action perspectives. In the panel discussion, we will delve into sustainable farming practices, water governance models, policies, and case studies to showcase the importance of healthy soils.

Soils nourish our crops, clean our water, and store vast amounts of carbon. They secure water sources and are crucial in our quest for climate resilience. However, soil health and regeneration are not yet mainstreamed across Europe. In this panel, we will give the floor to experts and practitioners to showcase best practices and the way forward for healthy soils and water security.

REVOLVE

Healthy soils & healthy water for a healthy future

Agenda

18.30 – 19.30

Panel discussion

Teresa Gimeno,

Researcher, CREAM

Teresa is a researcher at the research centre CREAM. She holds a PhD in Conservation of Natural Resources and has worked for multiple public research institutions in Spain, France, and Australia throughout her career. In her research, she examines how vegetation responds to global change drivers, primarily climate change and changes in land use. She combines experiments, observational studies, and modelling to predict how our ecosystems will respond to future climatic conditions.

Oliver Goshey,

Farm Transition Facilitator, Climate Farmers

Oliver Goshey is a small farmer, regenerative project designer, and watershed restoration specialist with experience in over 20 countries. In his work with Climate Farmers he works with a growing community of farmers around Europe developing educational resources and support mechanisms in their transition to regenerative management of their land.

Carlos Ortiz,

Fertilization and Manure Treatment Office, Generalitat de Catalunya

Carlos holds a PhD in Agronomy from the University of Lleida (UdL). He specialized in soil, water, and waste management, with knowledge of related legislation. He currently leads the Fertilization and Manure Treatment Office of the Department of Climate Action, Food and Rural Agenda in Catalonia, which is responsible for coordinating the improvement of manure management and bringing agricultural knowledge closer to the local level.

Moderator REVOLVE journalist:

Marta Castillo, is an environmental journalist who is actively involved in soil and agroecology-related projects.

Culture Jam on Soil Literacy

Healthy soils & healthy water for a healthy future

19.30 – 19.45	Q&A
19.45 – 20.00	NBSOIL Project learning and facilitation tools showcase
20.00 – 21.00	Drinks & Networking
